BCHOD & PARTNERS PROFILE

Messrs **BRIAN COLQUHOUN, HUGH O'DONNELL AND PARTNERS (Z)** is an entirely Zambian owned firm of Consulting Engineers operating in Zambia since 1948, with the primary objective of providing comprehensive consultancy services in a wide range of engineering fields. The company has been involved in various technical infrastructure designs and development projects for both Government Institutions under Build Operate and transfer modules or Public Private Partnerships and the Private sector.

The Firm has successfully executed several projects on a joint venture basis with other internationally renowned consulting firms. Such arrangements have ensured that we remain abreast of the developments in the engineering fraternity for competitive implementation for our Clients.

Apart from the Zambian practice, BCHOD has well-established practices in other Southern African countries. These companies operate as autonomous practices in the following countries:

- **ZAMBIA** : Lusaka and Ndola
- **ZIMBABWE:** Harare & Bulawayo
- **BOTSWANA** : Gaborone

As a multi-disciplinary firm, Brian Colquhoun, Hugh O'Donnell and Partners is able to offer a complete service from feasibility study and design, management and supervision, to project completion in all types of Engineering related services.

Our Services Include:

- Transportation
- Water and Sanitation
- Housing and Infrastructure Development
- Geotechnical and Highway Management Systems

STAFFING AND PARTNERSHIP

BCHOD's current staff establishment comprises a total of 52 personnel operating at the Head Office in Lusaka and field offices. It is managed by a Board of Partners with Mr. George Sitali as the Managing Partner.

Managing Partner – George Sitali

George Sitali, has been the Partner of the firm since 1997 and he is a qualified civil engineer with more than 20 years of professional experience in the study, design, tender and contract document preparation and execution of civil, structural and highway projects in Zambia and the SADC region. He is an experienced engineer with the required skills to co-ordinate and support the project team and to work in partnership with the Client and other stakeholders involved in the project execution. George has a long-term relationship with the company (e.g. permanent employee for more than 20 years) and has executed a large number of highway projects for different donor agencies and the Government of the Republic of Zambia (GRZ) in the past decade.

George has carried out feasibility studies as well as projects involving the preparation of detailed designs, tender documents and pre-contract services in the field of highway and drainage works. He has been involved in projects concerning pavement evaluation and rehabilitation design of runways and taxiways at Lusaka International Airport, Livingstone International Airport, Kasama Airport and Kashikishi Airstrip. He is fully conversant with all functions of project management and the necessary techniques in ensuring the smooth operation of highway engineering projects. George has also been project manager on the Highway and Bridge Management System for Zambia. He has extensive experience in international procurement methods and guidelines including FIDIC and RDA guidelines.

Partner – Moses Nkhata

Moses Nkhata has been the Partner of the firm since 1997 and he is a qualified civil engineer with more than 20 years of professional experience in execution of water and drainage related projects. Moses has in fact been engaged on various civil engineering projects locally and internationally. He has gained remarkable experience in execution of studies, detailed designs, tender and contract document generation, project management and general supervision of various kinds of civil engineering works and building structures. He is an accomplished Water Engineer with invaluable experience and suitable to manage and coordinate the project team and also to work hand in hand with other stakeholders.

Moses apparently also worked as a contractor for three years and hence is quite familiar with the construction industry at various levels. In the design office he has been involved in several notable design projects all over the country. He has also played the role of Project Manager and Project Engineer on several joint venture programmes with internationally renowned consultants. On the most recent programmes he played a central role in design of water related works in various parts of Southern Africa.

He has considerable experience as technical expert working on behalf of funding agencies for project appraisal, project control and follow-up, as well as project evaluation of foreign funded projects and is thus very much acquainted with internal procedures and the project philosophy of projects financed by different donors.
Moses has a great flair for strategic planning that has enhanced his management skills and hence plays pivotal roles in implementation of projects of different magnitudes and complexity. He is also a gifted team player with excellent inter-personal skills.

He has affiliation with the International Water Association (IWA) - UK, Water and Sanitation Association of Zambia (WASAZA) and he is a Registered Engineer with the Engineering Registration Board of Zambia.

Partner – Jowitt Kaluwa

Jowitt Kaluwa has been a Senior Partner of the firm since 1987 and he is a qualified civil engineer with more than 30 years of professional experience in execution of civil and highway projects. He also holds Master Science in Water Resources Management. He has worked both in public and private sectors as a civil engineer, team leader and specialist in multi-disciplinary teams. He has gained remarkable experience in execution of studies, detailed designs, tender and contract document generation, project management and general supervision of various kinds of civil and highway engineering works and drainage structures. He is an accomplished Civil Engineer with invaluable experience and suitable to manage and coordinate the project team and also to work hand in hand with other stakeholders.

Jowitt also worked as a City Engineer for Ndola City Council for four (4) years and hence is quite familiar with the government contracts at various levels. In the design office he has been involved in several notable design projects all over the country. He has also played the role of Project Manager on several joint venture programmes with internationally renowned consultants. On the most recent programmes he played a central role in the design of Livingstone City roads.

Jowit has considerable experience as a technical expert working on behalf of funding agencies for project appraisal, project control and follow-up, as well as project evaluation of foreign funded projects and is thus very much acquainted with internal procedures and the project philosophy of projects financed by different donors and the Road Development Agency (RDA).

He has a great flair for strategic planning that has enhanced his management skills and hence plays pivotal roles in implementation of projects of different magnitudes and complexity. He is also a gifted team player with excellent inter-personal skills. He has affiliation with the Institution of Water and Environment Management, the Zambia Association of Arbitrators and Fellow of the Engineering Institute of Zambia.

Tresphor Musonda – Associate Partner

Tresphor Musonda has been an Associate Partner of the firm since 2005 and is a Civil Engineer with over 20 years professional experience in Geometrical and Pavement Design of roads for different conditions and various cities of Zambia. He holds a Bachelors Degree in Civil and Environmental Engineering from the University of Zambia and is a Candidate for a Masters degree in Pavement Engineering from the Stellenbosch University. Tresphor has experience in the fields of traffic, transportation planning and highway engineering sectors. His assignments include Monitoring/organizing the engineering studies/investigations for various projects, Traffic and Transportation studies. He has been involved in both, detailed highway design and infrastructure projects site supervision responsibilities, thus gaining extensive experience and insight of the technical aspects and difficulties of designs as well as construction processes.
